ABOUT ME

Biomedical Engineer with a Master's degree in Biomedical Engineering, specializing in software development, virtual reality simulation, and applied AI. Experienced in designing VR-based medical simulators with Unity and managing databases through Node.js.

I have collaborated with multidisciplinary hospital teams to develop and validate simulation tools for medical device sterilization, ensuring accuracy, usability, and practical impact. Strong in engineering fundamentals and software development, I adapt quickly to new technologies and complex challenges, and I am eager to contribute to innovative, technology-driven projects in medical technology and simulation.
